Mathematical Biosciences

an international journal

Volume 100 1990

José M. Gonzalez-Fernandez (Bethesda, MD)
Parameter Dependence of Myoglobin-Facilitated Transport of Oxygen in the Presence of Membranes 1
Shiojenn Tseng (Tamsui, Taiwan) and Jyh-Ping Hsu (Taipei, Taiwan)
A Stochastic Analysis of the Repair of Radiation-Induced DNA Double-Strand Breaks 21
Ruth Nussinov (Ramat Aviv, Israel), Bruce Shapiro, Shu-Yun Le, and Jacob V. Maizel, Jr. (Frederick, MD)
Speeding Up the Dynamic Algorithm for Planar RNA Folding 33
J. M. Murray (Kensington, Australia)
Some Optimal Control Problems in Cancer Chemotherapy with a Toxicity Limit 49
John Stuart Bradley and Ronald James McKay (Murdoch, Australia)
A Monte Carlo Study of Tests on Data Originating from Quadrat Sampling I: Data from a Poisson Distribution 69
Paul M. Schlosser and James E. Bailey (Pasadena, CA)
An Integrated Modeling-Experimental Strategy for the Analysis of Metabolic Pathways 87
Bruce Hannon (Urbana, IL)
Time Value in Ecosystems 115

Book Review

R. P. Tewarson (Stony Brook, NY)
Introduction to Mathematical Physiology and Biology (J. Mazmudar) 141

Elsevier

WAYNE S. KENDAL (Toronto, Canada)
The Use of Information Theory to Analyze Genomic Changes in Neoplasia 143
FRANK M. J. VAN DER LINDEN (Eindhoven, Holland)
Creating Phyllotaxis: The Dislodgement Model 161
DAVID GREENHALGH (Glasgow, Scotland)
Vaccination Campaigns for Common Childhood Diseases 201
MARK MANGEL (Davis, CA)
A Dynamic Habitat Selection Game 241
WILLIAMS O. WILLIAMS (Pittsburgh, PA)
A Purely Mechanical Theory on Muscular Contraction 249
